PRODUCTS - PHILOSOPHY - METHOD

“

For lifelong safety and joy in the water, it is important that we create the ideal conditions for our children in the wet element.

There are two things babies can't do alone in the water: keep their balance and lift their heads up for a long time.

For these reasons, they need a safe flotation device to support them.

PHILOSOPHY & METHOD

With many years of experience in the own swimming school,
FREDS SWIM ACADEMY developed a 3-stage swimming learning system with the SWIMTRAINER
"Classic", with which children can learn the optimal breaststroke swimming style.

„Having fun safely!“

According to this company motto, the SWIMTRAINER "Classic" gives children lots of **swimming fun** in every **development phase** and the necessary **sense of achievement** combined with a **high degree of safety**. Thus, the basis for **successful swimming learning** is laid early on and a **lifelong, positive relationship with the element of water** is created.

The SWIMTRAINER "Classic" red, orange and yellow are used depending on the **age and learning progress** of the child. **Even early intervention** is possible already in infancy. The technical training that builds on it ultimately leads to an **optimal swimming style**.

Successful Olympic Swimmer

The SWIMTRAINER are great because the children are in the correct swimming position, which makes learning to swim easier. I can highly recommend the FRED'S SWIM ACADEMY and the system with the SWIMTRAINER.
